Centralized Data for Better Business Insights.

From Fragmented Data to Centralized Intelligence

CData Sync's no/low code data pipeline offering brings the power of near real-time data to your fingertips without the need for specialized programming or system knowledge. Sync quickly integrates data from any source, cloud platform, or on-premises system so it can be leveraged by leading analytics, BI, Reporting, ERM, Accounting, and Marketing solutions to support important business initiatives.

ETL Without the Hassle

Quickly and easily create ETL/ELT data pipelines in a user-friendly no/low code approach. No programming or specialized skills required.

Goodbye to Fragmented Data

CData Sync provides near real-time powerful incremental updates and Change Data Capture capabilities to ensure that your data is fresh and ready for business use.

Simple Data Migration

Migrating on-premises systems to the cloud has never been easier than with CData Sync. Leveraging the High Availability feature enables the distribution of large data sets across multiple Sync environments promises seamless migration from your on-site systems to your favorite cloud environments and vice versa.

✓ **Universal Connectivity –** Easily connect to hundreds of cloud applications and on-premises data sources.

✓ **Intelligent Replication –** Deliver high performance data pipelines based on CDC, full, or incremental replication with no impact on source systems.

✓ **Flexible Deployment –** Deploy CData Sync in the cloud or on-premises.

✓ **Secure Access –** Fully encrypted data transfer and no storing of data inside of Sync guarantees your data is always secure.

✓ **Flexible Transformations –** Call advanced dbt Core transformations or utilize SQL inside of Sync for expanded transformation capabilities.

Sync provides data where and when you want it to drive reliable decisions.

- Easy cloud or on-premises installation and implementation
- Access data from over 250 sources
- Quickly align cloud and on-premises data
- Easy data enrichment for analysis
- Extract, Load and Transform
- Predictable connection-based pricing

CData Software – Leading Provider of Data Access & Connectivity Solutions

Our mission is to simplify the way that users and applications connect with data. We offer a straightforward approach to integration, with easy-to-use data providers, drivers, and tools available from any technology capable of interacting with major database standards.

Our drivers are universally accessible, providing access to data through established data standards and application platforms such as ODBC, JDBC, ADO.NET, OData, Snowflake, Salesforce, Excel, etc. This approach allows businesses to realize the substantial benefits and cost savings of integration while reducing complexity and expense.
