Connect effortlessly to all your data from any cloud reporting, analytics, or business tools.

Data Connectivity as a Service

Get the data you need to build reports, derive analytical insights, and streamline operations with real-time connection to your existing tools and applications. CData Connect Cloud provides instant, consolidated access to the live data you need, eliminating data silos across your tech stack. Connect everything instantly – without writing a line of code.

Instant Access to Your Cloud Data

CData Connect Cloud takes SaaS to the next level with the introduction of Data Connectivity as a Service. CData Connect Cloud provides your applications with direct, real-time access to the data you need, wherever you need it — without having to process the data through a complex integration pipeline.

Enterprise Data Access and Governance

CData Connect Cloud's easy to use, centralized interface ensures granular user-level security and governance controls, allowing IT to sleep well knowing that only those with permissions have access to secure data. In addition, your data is not stored in our platform – we simply transport data between systems and applications to give you access to your live data straight from the source.

✓ **Universal Connectivity –** Easily connect to hundreds of cloud applications and data sources.

✓ **Standardize on SQL –** CData Connect Cloud speaks the language you know and love, SQL, regardless of data structure or type.

✓ **Point & Click Configuration –** Simplify data administration by creating connections to your data within just minutes.

✓ **Secure Access –** Avoid Shadow IT practices and ensure that your data is secure with user-level select, read, write, delete, and export controls.

Connect Cloud provides effortless access to real-time data needed to drive decisions.

- ☑ No software to install
- ☑ No drivers to configure
- ☑ No database required
- ☑ Works with all the data applications you use

- ☑ Real-time integration with 100+ enterprise sources
- ☑ Rich metadata discovery
- ☑ Read write, & update live data
- ☑ Predictable user-based pricing

CData Software – Leading Provider of Data Access & Connectivity Solutions

Our mission is to simplify the way that users and applications connect with data. We offer a straightforward approach to integration, with easy-to-use data providers, drivers, and tools available from any technology capable of interacting with major database standards.

Our drivers are universally accessible, providing access to data through established data standards and application platforms such as ODBC, JDBC, ADO.NET, OData, Snowflake, Salesforce, Excel, etc. This approach allows businesses to realize the tremendous benefits and costs savings of integration while reducing complexity and expense.
