Solving EDI headaches with simple, scalable, self-service B2B integration

EDI drives supply chain communication, but EDI integration can come with a lot of headaches. Whether your frustration with EDI stems from transaction fees, slow onboarding time, or difficulty managing and scaling your B2B processes, CData Arc gives your team the tools they need to simplify, automate, and scale your EDI processes.

Deploy CData Arc on-premises or in the cloud and leverage an intuitive designer-driven UI to quickly create no-code EDI integration workflows. Eliminate bottlenecks and risk by automating every step of your EDI process – secure data transfer with partners, streamlined EDI mapping & transformation, back-end integration with databases, ERP systems, flat files, and more.

Break away from per-transaction fees

CData Arc offers transparent and scalable licensing model, depending only on the number of trading partners and back-end systems you need to integrate – not how many EDI transactions you process.

Save time & money onboarding partners

3-step connections with trading partners and streamlined EDI mapping from CData Arc ensure your onboarding experience is shorter and less frustrating than ever.

Gain control over your EDI integration

Self-service model empowers your team to create, own, and manage your EDI processes – no more need for external black box integration teams, uncertain deadlines, and unpredictable costs.

Application Features:

✓ No-code, drag-and-drop EDI mapping and translation

✓ Universal back-end connectivity: databases, SaaS apps, & more

✓ Custom reporting and error-handling, advanced message tracking

✓ Fully-documented API for remote and scripted management

Drummond-Certified MFT for secure and reliable file exchange

Every MFT protocol & EDI standard

Drummond-Certified MFT and automatic EDI translation

Securely and reliably exchange critical business documents with your partners – no matter what protocols, EDI standards, and document types they use. Connect to your partners in just 3 steps to start communicating with any number of external organizations in mere minutes. Automatically translate EDI documents to and from your preferred formats to strip away unnecessary complexity.

Every backend database, app, or file

Connect your B2B to your back-end with drag & drop mapping

Leverage no-code visual drag & drop data mapping from CData Arc to easily convert B2B data into a format suitable for your back-end systems. Whether you use databases, data warehouses, or SaaS applications like CRMs, ERPs, accounting platforms, or e-commerce storefronts, Arc can connect and integrate in just 3 steps. Create truly end-to-end automation pipelines that seamlessly align your internal data ecosystem with your external B2B communication.
